This plan has been produced in accordance with Planning the National Planning Policy Framework (NPPF). Because the information is indicative rather than specific, the Local Planning Authority will nevertheless need to consult the Environment Agency on individual applications. Users should note that the flood plain extents were mapped at 1:10,000 scale, as appropriate to the level of investigation and are based on information available at the time of survey. Amendments will be required in future to account for information gathered subsequently e.g. changes in sea level predictions or observations following flood events. When in doubt the Environment Agency should be consulted.
