

F&HDC Risk Assessment

FHDC RA 0143

Risk Assessment Explanatory Notes

This risk assessment has been compiled in accordance with an employer's statutory duty to do so under the Health and Safety at Work act (1974) and complies with the Management of Health and Safety at Work Regulations (1999).

Severity Indices

1. Minor Injury = Abrasions, bruising, minor burns (reddening of the skin).
2. Significant Injury = Lacerations leading to blood loss, secondary burns (leading to blistering), sprains & strains, muscle & ligament injury, minor head injuries, acute representations of underlying conditions i.e. asthma, epilepsy, bronchitis illness, diabetes, hyper/hypothermia.
3. Serious Injury = Fractures, trauma leading to significant blood loss, head injuries leading to periods of unconsciousness, acute representations of underlying conditions such as angina.
4. Major Injury = Multiple fractures, spinal or cervical injury, multiple trauma, injury affecting respiratory system, head injuries leading to significant periods of unconsciousness, myocardial infarction, status epileptics / asthmatics.
5. Major Incident/Fatality = Single or multiple fatality or large numbers of injuries in cat 3-4.

Severity x Probability Values

	1	2	3	4	5
1	1	2	3	4	5
2	2	4	6	8	10
3	3	6	9	12	15
4	4	8	12	16	20
5	5	10	15	20	25

Key

GREEN : Acceptable Risk

YELLOW : Risk Acceptable with Adequate Control Measures

RED : Unacceptable Risk

Severity**Probability**

1	Minor Injury	1	Unlikely
2	Significant Injury	2	Possible
3	Serious Injury	3	Highly Possible
4	Major Injury	4	Probable
5	Major Incident/Fatality	5	Certainty

The probability and severity rating associated with each individual hazard, is calculated before the controls are put into place. Once the controls are in place, the hazard and its severity may not change, but the probability shall be reduced to an acceptable level.

It is the responsibility of the Council to ensure that its risk assessments are regularly reviewed. The review period will generally be annual unless there is significant change to the work activity. It is important that Managers carry out ongoing monitoring of work activities and any changes resulting in the escalation of either the severity or the probability rating of an identified hazard or the discovery of a new hazard are to be reported immediately to Corporate Health and Safety.

This risk assessment is based on the latest HSE and Government information / guidance around COVID 19 and the key areas.
