

This map shows flood hazard from coastal surges comprising flooding from breaching and overtopping of defences. It should be noted that certain locations not shown may be at risk of flooding from other sources (fluvial, pluvial, sewer flooding etc) and from other watercourses not shown in this study.

**HAZARD MAPS [2015]**  
 Shepway District Council  
 Strategic Flood Risk Assessment

**Hazard Map Legend\***

- 0.5 - 0.75 [Low]
- 0.75 - 1.25 [Moderate]
- 1.25 - 2.5 [Significant]
- > 2.5 [Extreme]
- Overtopping Boundary
- Overflow Boundary
- Breach Locations
- Shepway Boundary

\*Hazard Rating calculated in accordance with criteria set out in "Flood Risk to People" (R&D Output FD2320/TR2)

Refer to Table 9.1 for details of Breach Characteristics  
 Refer to Table 9.2 for details of Breach and Overtopping Scenarios

This plan has been produced in accordance with Planning the National Planning Policy Framework (NPPF). Because the information is indicative rather than specific, the Local Planning Authority will nevertheless need to consult the Environment Agency on individual applications. Users should note that the flood plain extents were mapped at 1:10,000 scale, as appropriate to the level of investigation and are based on information available at the time of survey. Amendments will be required in future to account for information gathered subsequently e.g. changes in sea level predictions or observations following flood events. When in doubt the Environment Agency should be consulted.

The cell size of this map has been resampled from 25m to 5m to improve viewing resolution. Therefore, this map should only be used at a strategic level.
