Subject: Princes Parade

For the attention of Caroline Williams

reference NATTRAN/SE/S247/3254

Dear Caroline,

as a long time resident of Hythe I am strongly opposed to any development of Princes Parade.

This land was bequeathed to the people, for the people, it was never intended for the rich few to monopolies.

Our planet is facing a climate emergency, surely we should be looking to ways to retain wild, green spaces and not concreting Hythe. This land is on a flood plain, so by building here, are we not risking the whole stability of the Eco system Hythe/Seabrook/Sandgate is built upon? I propose, rather than building on this land we should be looking at ways to re-wild the area.

Look at our Cinque Port neighbour Rye, they have re-created the Salt Marsh and brought back diverse groups of wildlife to the area. Please let Princes remain as a green, recreational space for our physical, mental and spiritual well-being as well as a benevolent legacy for our children and future generations.

Yours Sincerely - Jack Pound.
