Dear officers

I am registering my objection to the totally unnecessary rerouting of Princes Parade. This current road alleviates the strain on the residential inner road , which is the main south coast route east /west and extremely busy all day and night. as my son a resident will testify. It carefully carries away all unnecessary water without harming anyone or thing. It allows all of us a beautiful green/water/sea space in an area of intense development.

There is insufficient room to safely bed in the new road in such a narrow floodplain. The proximity to the historical canal is a travesty.

. The beautiful aspect of this road is unique on the south coast allowing everyone of all incomes & green ways of transport direct access to the sea shore. It is being moved WITHOUT sufficient knowledge of the effect on the wonderful nature filled canal side & canal, previously allowing a safe level of run off.

We have already seen the result of their lack of knowledge in such matters with the premature development of a running track on a floodplain in Folkestone which has now been abandoned and a complete eyesore. This would be a terrible outlook for princes Parade.

Yours faithfully a 30 year+ resident of Folkestone & Hythe.

Margaret Gretton
