

## **Update to Application Document submitted in November 2022**

### **OP5 Appendix 4.1 – Development Specification (November 2022)**

- This document replaces the version dated August 2022
- The date on the front cover has been changed to read November 2022
- The heritage commitment regarding barrow 44 in Appendix 4 has been revised in response to comments from Historic England. It now reads “buildings closet to the barrow will be no more than two storeys in height and buildings to the rear will be no higher than three storeys in height (to ensure acceptable massing relationship between built form and barrow 44)”.
