I am writing to object to the closure of this important route between Hythe and Sandgate.

The proposed closure will cause more traffic along Seabrook Road which is residential road.

It will cause Slower journeys as the road is a 40 mph zone.

The stopping up of the road will seriously effect access to the promenade which is a popular destination for tourism in Hythe.

The local council have recently spent a large amount of money to create a metered parking zone and stopping up the road will result in a loss of revenue

The purpose of the stopping up of the road is to facilitate the development of the area for housing and leisure. This is a current planning application and this stopping up should be considered together with the whole scheme
