I'm supporting the group trying to save princes parade and the road closure for these reasons

a) that this development is unacceptable and creates significant harm, but if the development were to be granted planning permission there is no overriding need to move the road as the proposed buildings could be served from the existing road. It is therefore not necessary for it to be stopped up and realigned for this development to take place.

b) I am asking for the stopping up order to be considered by the Secretary of State at the same time as the planning application so that he may see the full picture. This is very important.

I am also aware of this guidance

“In the exercise of that discretion the relevant authority is obliged to take into account any significant disadvantages or losses flowing directly from the stopping up order which have been raised, either for the public generally or for those individuals whose actionable rights of access would be extinguished by the order. In such a case they must also take into account any countervailing advantages to the public or those individuals, along with the planning benefits of, and the degree of importance attaching to, the development. They must then decide whether any such disadvantages or losses are of such significance or seriousness that they should refuse to make the order”

the closure of the road, and indeed the development, would seriously affect the local area to its detriment. I have serious concerns about the impact the new diverted road would have on the canal, the effect on traffic in the residential area, impact on other roads, not to mention the wildlife that should be protected.

Please consider my objection seriously and escalate to the Secretary of State. This development is not only not necessary it is also damaging and impactful to wildlife. Something that should be taken extremely seriously. there are plenty of areas in Shepway already being developed. This area of outstanding natural beauty and nature does not need to be destroyed for financial gain. Please consider the long game. So often neglected. You are in Government and have a duty of care. It is your duty to represent the people and take these objections you are receiving seriously.

Thank you
