Dear Sirs,

Otterpool Project
and WATER SHORTAGE.

29 MAY 2018

Seeing we, as a nation, have ^{now} been warned of
being short of water in years to come. It is to
once again, how that has been obvious in Keeset
many years. Last year 2017 we were on the ve
a draught, ^{again} yet people like you, whose wages we p
out of our taxes, come up with these politically bright
to solve the housing shortage - a new country town.
YET YOU HAVE NO INTELEGENCE TO SAY FROM WH
THE WATER FOR THIS DREAMWORLD IDEA IS
COMING. No arrangements have been made anyo
the County for extra water. I understand our reservoirs
been partially filled this springtime. With this utter
absence of intelligence for goodness sake

SCRAP THE OTTERPOOL IDEA

It will only add to our water problems, especially as the so-called planners and Councilors of Folkestone and Hythe, let alone neighbouring towns and villages are putting housing developments down without the scrap a thought about water - let alone sewage problems.

So please scrap the Otterpool idea and also the housing idea - top quality not every day users - along Prince's Parade and the change of road scheme they have unilaterally dreamed up.

All this is a legacy for the next generation you are leaving.

Thanking you for your attention

Yours sincerely
