Subject: Road closure proposal Princes Parade, Hythe, Kent

Ref: NATTRAN/SE/S247/3254

I am objecting to the above proposal

Many reasons to save this road. Traffic congestion in surrounding area will increase and further bottle necks and possible accidents from frustrated motorists. Drivers driving around looking for places to stop/park.

There will be major congestion in surrounding residential streets. The loss of this direct route between Hythe and Seabrook will affect many users.

The current road and sea wall is a combined unit. The disruption and building works necessary to remove this road - should planning be granted will entail prolonged building works.

Yours
John Sinclair-Thomas Mr.
